Art Unit: 2815

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21 are, drawn to a light emitting die package, classified in class 257, subclass 79+.
- II. Claims 22-26 are, drawn to a method of manufacturing a light emitting die, classified in class 438, subclass 125+.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product claimed may be made without the step of cutting whereby a prefabricated stem substrate may be used.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to S. V. Clark at telephone number (571) 272-1725.
